

Professor Moore- Artist Statement

First let me just say I enjoy teaching Radio TV and Film most of my personal films are animated. I'm an old school animator who has embraced this growing new media technology like a kid in a candy store. When I was in College you couldn't major in animation. You had to major in film! So I was a closet animator majoring in film which basically mean I had to learn how to make movies to be an animator. Now I'm out of the closet thanks to this growing new media technology.

I like the opportunity of making animated cartoons come to life, looking at someone as they listen to themselves as an animated cartoon character and the power you have as an Animator, Filmmaker, Designer, etc., to convey a message and or tell a story whether it's for educational or entertainment.

I love to draw and laugh, which seems like has been a part of my make up as a person for as long as I can remember.

The special thing about my animation (artwork) is that I mix the old school and the new school styles, techniques, & storytelling together. It helps when I am explaining this growing new media technology to bridge the generation gap.

I can express myself with my animation (artwork) in a way which can live on this earth after I'm gone and help educate, entertain or both.
